

Tungsten Carbide Tipped Holesaws

3 - Edge Cutting System for longer life, speedy boring

There are two sets of three different edged cutting teeth. One tooth slanted outward, one inward and one that peaks in the centre. This arrangement balances the cutting effort for smooth boring, better control and less chance of excess drag.

Metacore MCTR - 25mm Depth

Highest Quality Japanese Tungsten Carbide Tipped Holesaws. Suitable for drilling Steel Plate, Stainless Steel, A.C. Sheeting, PVC, Concrete Coated Pipes up to 25mm thickness. Not for Impact Use. Ejector spring fitted as standard.

Display Stand

The Display Stand can be provided with appropriate stock orders. Contact ITMS for more information.
