

Drill Bit Sharpeners

HIGHEST QUALITY DANISH DRILL BIT SHARPENERS

Uncomplicated - KEF drill grinders are based on a well-proven grinding method which always results in flawless and accurately ground drill points. KEF Sharpeners are pre-set for grinding twist drills, for drilling in steel and iron, with point angle 116-118 degrees and clearance angle 6-8 degrees. The simplified design ensures that a wide range of different drill sizes can be ground without complicated and time-consuming re-setting. Therefore unskilled operators can also obtain good results.

The twist drill is placed in the drill grinding attachment. Firmly put your thumb on the drill to hold it in the attachment and with a firm movement swing the attachment from left to right and back again, until no sparks occur during grinding. When the first flute is finished, turn the drill 180° and repeat the operation. The drill is now ready for use.

KEF-6NE

Professional Drill Bit Sharpener - 30mm Drill Bit Capacity

Drill Capacity | 4-30mm
 Point Angle | 116° - 118°
 Relief Angle | 6° - 8°
 Motor | 480W
 Voltage | 240V 1PH
 Weight | 25kg

Part Number	Description
KEF-6NE	KEF Drill Sharpener, 4-30mm Capacity

KEF-8NE

Professional Drill Bit Sharpener - 60mm Drill Bit Capacity

Drill Capacity | 4-60mm
 Point Angle | 116° - 118°
 Relief Angle | 6° - 8°
 Motor | 750W
 Voltage | 240V 1PH
 Weight | 34kg

Part Number	Description
KEF-8NE	KEF Drill Sharpener, 4-60mm Capacity

KEF-PSD5

Heavy Duty Professional Drill Bit Sharpener - 60mm Drill Bit Capacity

Drill Capacity | 4-60mm
 Point Angle | 116° - 118°
 Relief Angle | 6° - 8°
 Motor | 1100W
 Voltage | 415V 3PH
 Weight | 70kg

Supplied on a pedestal with table & water cup
