CARBIDE GRIT HOLESAWS

Cuts extremely hard abrasive materials: Laminates, fiberglass, ceramic tile, marble, slate, cast iron and composites. Cutting edge of tungsten carbide particles bonded to alloy steel back. High heat and abrasion resistance, no teeth to dull or chip, resists snagging, smooth cutting, greater wear resistance. Ideal for plumbing, construction, marine and aircraft applications.

5 mm (3/16") thick heavy-duty backing plate eliminates drive hole elongation and the need for drive plate.

37 mm (1-7/16") depth of cut

RemGrit hole saws (without arbors) feature a gulletted grit edge.
